**EASTERN REDBUD, *Cersis Canadensis*,** is a smaller stature tree, maturing to 30 ft in height and width. It grows in moist, and well drained soils, in full/partial sun. Desirable qualities include clusters of rose pea-like flowers in the spring, with leaves turning yellow in the fall.

**Pin Oak, *Quercus Ellipsoidalis*,** needs room to grow, reaching 60 ft high and 45 ft wide. An attractive shade tree with a pyramidal-oval habit of growth, pointy leaves, and excellent rich red fall color; this variety produces straighter branching, substantial foliage and a more symmetrical shape; a great shade tree choice.

**Autumn Brilliance Serviceberry,** is covered in stunning clusters of white flowers rising above the foliage in early spring before the leaves. It has dark green foliage throughout the season. The oval leaves turn an outstanding brick red in the fall. It produces blue berries in late spring. The smooth gray bark adds an interesting dimension to the landscape. Grows to 25 ft high and 20 ft wide. Provides great habitat for birds.
